effects such as eye irritation or nausea. Care should be taken not to exceed the TLV.
 INGESTION..... Irritating to mouth, throat and stomach. May cause gastric tract disorder and/or damage. Small amounts of liquid aspirated into the respiratory system during ingestion or from vomiting, may cause bronchopneumonia or pulmonary edema.

4. FIRST-AID MEASURES

EYE..... Immediately flush eyes with large amounts of water for at least 15 minutes, lifting upper and lower lids. Get prompt medical attention.
 SKIN CONTACT..... Flush with large amounts of water; use soap if available. Remove grossly contaminated clothing, including shoes, and launder before re-use. Discard shoes. If irritation persists, get medical attention.
 INHALATION..... Remove to fresh air. If breathing is difficult, give oxygen. If breathing has stopped, give artificial respiration. Get medical attention.
 INGESTION..... DO NOT induce vomiting. If individual is conscious, give milk or water to dilute stomach contents. Keep warm and quiet. Get prompt medical attention.

5. FIREFIGHTING MEASURES

AUTOIGNITION..... Not available

apparatus to protect against potentially toxic and irritating fumes; Cool exposed equipment with water spray
 FIRE & EXPLOSION HAZARDS..... Vapors are heavier than air and may travel a considerable distance to a source of ignition and flash back. Combustion may release noxious or toxic vapors. See Reactivity.
 UPPER EXPLOSION LIMIT (%)..... 7.0
 LOWER EXPLOSION LIMIT (%)..... 1.0
 NFPA FLAMMABILITY HAZARD CLASS..... 4 = Extreme

6. ACCIDENTAL RELEASE MEASURES

SPILL AND LEAK PROCEDURES..... Shut off ignition sources. Stop leak if you can do it without risk. For small liquid spills, take up with sand or other absorbent material. For larger spills, dike far ahead of spill for later disposal. No smoking, flames or flares in hazard area! Keep unnecessary people away.

For safety and environmental precautions, please review entire Material Safety Data Sheet for necessary information.
